Dear Participant,

Welcome to Copenhagen, Denmark for the 4th European Public Health Conference which takes place from 9 to 12 November 2011. We look forward to present you an exciting professional programme with high-level plenary speakers, oral sessions, moderated poster sessions, workshops, and exhibitions. We also have more than 20 pre-conferences focusing on a large array of interesting subjects.

We hope Copenhagen 2011 will continue to encourage contacts between researchers and practitioners in the different countries. When the decision was taken to place the conference in Copenhagen, the Danish Society of Public Health felt that we should focus on Public Health and Welfare – Welfare Development and Health. We have a long tradition in the Nordic countries to develop our societies along a welfare tradition. Europe and the world have recently been confronted with an economic crisis and recession. Both in our plenary sessions and parallel programme, we will discuss important questions to the impact of such crises in modern society: Are our societies today robust towards economic crises? Are there differences between the European countries? Which kinds of welfare models are we working with in Europe? Does the impact of social policy and labour market make a difference on the welfare situation of populations?

It is an old saying in public health that the major improvement in health of the population is mainly due to improvements in living conditions (income, housing, work, hygiene, environment etc). Also lifestyle plays an important role. So far the contribution by preventive and curative health services has not been considered especially important. When looking at the growing elderly population of Europe, there seems to be a change in point of view. Many claim health services to be very important for the elderly population of Europe in order to improve welfare and daily functioning.

New technologies and new drugs have been developed. We therefore wanted an overview where we focus on the contribution of health services to the welfare of the elderly population. Public health training and education plays an important role for the future of professional intervention by public health professionals. We have therefore included a plenary session with a global perspective on this issue.

The planning and conduct of such a large conference as the annual European Public Health Conference cannot take place without the help and involvement of a lot of national and international bodies and persons. I am very grateful to the international and Danish bodies and persons having been involved in the planning. The economic support from the European Commission, from Danish foundations like Trygfonden and Nordea Danmark fonden and from public authorities like the Danish Ministry of Health/The National Board of Health is very important. The core team of planning and conduct of the conference has been Dineke Zeegers Paget and Dorli Kahr-Gottlieb, EUPHA and Torben Jørgensen and Finn Kamper-Jørgensen, The Danish Society of Public Health.

I wish you all a good and interesting conference.

Finn Kamper-Jørgensen
Chairman, Copenhagen 2011, President, Danish Society of Public Health
As presidents of the European Public Health Association (EUPHA) and the Association of Schools of Public Health in the European Region (ASPHER) we are honored to extend to each of you a warm welcome to the 4th joint European Public Health Conference held in Copenhagen jointly with the Danish Society of Public Health (DSOPH) from 9 to 12 November. The main theme of the conference is Public Health and Welfare – Welfare Development and Public Health.

We are very pleased this year with the high number and high quality of the pre-conferences organized on Wednesday 9 November and Thursday 10 November 2011. As for the conference programme, during plenary sessions we intend to give examples of the mutual relationship between public health and welfare. During the parallel programme all aspects of public health are presented, discussed and commented in the 65 oral sessions and 60 moderated poster sessions.

We are pleased to see that the EPH Conference continues to be a platform for European projects to present their results and/or to organize their committee meetings to further the project.

We hope you will enjoy the conference!

Walter Ricciardi  
EUPHA president

Antoine Flahault  
ASPHER president
GÖSTA ESPING-ANDERSEN
Professor of Sociology at the Universitat Pompeu Fabra, Spain, where he directs the DEMOSOC research unit. In 2009 he was nominated ICREA-Academia professor. His scientific work centres on life course dynamics, social stratification and comparative social policy. Before coming to Pompeu Fabra, he taught at Harvard University, the University of Trento and the European University in Italy. Among his major academic publications are numerous books, He has been actively engaged in applied policy relevant work for international organizations, including the United Nations, the OECD, ISSA, and the European Union.

MICHAEL MARMOT
Professor Sir Michael Marmot MBBS, MPH, PhD, FRCP, FFPHM, FMedSci. Director of the International Institute for Society and Health. MRC Research Professor of Epidemiology and Public Health, University College, London. Michael Marmot has led a research group on health inequalities for the past 30 years. He is Principal Investigator of the Whitehall Studies of British civil servants, investigating explanations for the striking inverse social gradient in morbidity and mortality. He leads the English Longitudinal Study of Ageing (ELSA) and is engaged in several international research efforts on the social determinants of health. He chairs the Department of Health Scientific Reference Group on tackling health inequalities. In 2000 he was knighted by Her Majesty The Queen for services to Epidemiology and understanding health inequalities.

ZSUZSANNA JAKAB
The World Health Organization’s Regional Director for Europe since 1st February 2010. Before her appointment, she served as the founding Director of the European Centre for Disease Prevention and Control (ECDC) in Stockholm, Sweden. Between 2002 and 2005, Ms Jakab was State Secretary at the Hungarian Ministry of Health, Social and Family Affairs. Prior to that, she spent 11 years at the WHO Regional Office for Europe in Copenhagen, in a range of senior management roles.

JEAN-MARIE ROBINE
Research Director at INSERM, the French National Institute of Health and Medical Research (www.inserm.fr), within the CERMES Research group in Paris (www.cermes3.fr) and the Unit 710 in Montpellier where he heads the research team Biodemography of longevity and vitality. He studies human longevity, with the aim of understanding the relations between health and longevity. In particular, he measures the impact that the increase in adult life durations may have on the health status of the elderly population.
Jørn Olsen is an MD and PhD and a professor at the School of Public Health, Aarhus University, Denmark as well as professor in residence at the UCLA School of Public Health in Los Angeles, USA. He is head of the Danish Epidemiology Science Centre and the Danish National Birth Cohort. He has been a consultant on epidemiology for the Danish Board of Health. From 2005 to 2008, he was president of the IEA, The International Epidemiology Association, and each year he teaches at the European Summer Course in Epidemiology in Florence, Italy. Jørn Olsen is the author of several textbooks on epidemiology and has written more than 500 peer-reviewed, scientific papers, mainly on reproduction, cancer and research methodology. He is an editor for the International Journal of Epidemiology, and associate editor for Human Reproduction Update.

Camilla Stoltenberg is a MD and epidemiologist. She served as director of the Division of Epidemiology at the Norwegian Institute of Public Health (NIPH) from 2002-2008, and is now deputy director general of the NIPH with responsibility for strategic development of national health registries. She is involved in a number of national and international research infrastructure projects aimed at development of biobanks, health registries and population based cohorts. Her scientific work focuses on autism and other neurodevelopmental disorders, perinatal and genetic epidemiology, health in immigrant populations, and social inequality in health.

Olle Lundberg is Professor of Health Equity Studies, and presently Director of CHESS. His main research interests have included welfare research, health inequalities and social determinants of health. His publications cover topics such as the size and trends of health inequalities in Sweden and internationally; welfare trends in Sweden during the crisis in the 1990s; income, relative deprivation and health; the importance of childhood conditions for adult health; Sense of Coherence and its connection to health; and health among older adults.
ELINA HEMMINIKI
Research professor in THL National Institute of Health and Welfare, THL, Finland and adjunct professor in public health in Helsinki and Tampere Universities. She has wide research experience in health services and epidemiological research. Her research interests include use, determinants and consequences of medical technology, particularly in the field of preventive services. Many of her examples come from women’s and children’s health and drugs (medicines). Her recent work includes studies on maternity care and its technology and postmenopausal hormone therapy. A methodology she is currently interested in is health services trials, and how ethical and governance rules apply to them.

ANTOINE FLAHAULT
Professor, MD, PhD, is dean of the new EHESP School of Public Health. He is professor in epidemiology, at University Paris-Descartes Hôtel Dieu. He has developed with WHO-HQ the global monitoring of influenza (FluNet). His work in research is conducted in a joint unit (UMR-S 707) at Institut National de la Santé et de la Recherche Médicale and University Paris 6 where he is the director of the WHO collaborating centre for electronic disease surveillance. He has written several books (in French) among them one best seller named “A(H1N1), le journal de la pandémie” and supervised a vast exhibition named “EPIDEMIK” in Paris La Cité des Sciences, and moved to Rio de Janeiro and Sao Paolo, Brasil in 2010.

VESNA BJEGOVIC-MIKANOVIC
Professor, MD, MSc and PhD in public health management, is professor at the School of Medicine, Belgrade University. She is a head of the Centre School of Public Health and director of the Institute of Social Medicine. Professor Bjegovic-Mikanovic is responsible for undergraduate education of medical student and postgraduate education of medical doctors and public health professionals. She is involved in different qualitative and quantitative studies related to the topics mentioned above, multilateral research, networking and projects, with published manuscripts in the same field. She is a member of the Executive Board of ASPHER.

KATARYNA M. CZABANOWSKA
MA, PhD, is an assistant professor at the Department of International Health, Faculty of Health, Medicine and Life Sciences, CAPHRI School for Public Health and Primary Care at Maastricht University. Her scientific interests are in the area of Public Health competencies, competences frameworks development, assessment and self-assessment methods, competence-based education, identification of skill gaps between the expectations of job market and taught curricula and innovative educational approaches in the lifelong learning in Public Health which is reflected in her publications and international project experience. Previously she worked at the Institute of Public Health, Jagiellonian University Medical College.
**STEPHEN SHORTELL**  
Dean, School of Public Health, University of California – Berkeley, USA and educated in business administration and behavioural science. He has been editor and chief for health services research and is member of advisory boards in several journals. He has long publication list with a number of books within health care management and has received several awards.

**JOSEP FIGUERAS**  
Director, WHO Europe, European Observatory for Health Systems and Policies. Josep has collaborated with multilateral organisations such as the European Commission and the World Bank. He is member of advisory and editorial boards and has served as advisor in more than thirty countries within the European region and beyond. He is honorary fellow of the UK faculty of public health medicine, has been awarded twice the EHMA price for the best annual publication on policy and management, and in 2006 he was awarded the Andrija Stampar Medal. He has been lecturer and head of the MSc Health Services Management, London School of Hygiene & Tropical Medicine.

**MOGENS LYKKETOFT**  
President of the Danish Parliament, former Foreign Minister and chairman of the Social Democratic Party. For three decades Mogens Lykketoft has been the vanguard of Danish politics. He has been a member of the Danish Parliament, Folketinget, since 1981, and is currently the President of the Parliament. He graduated in economics at University of Copenhagen. In the 1970s he was head of the Economic Council of the Labour Movement and the Social Democrats. During 1981-82 he served as Minister of Taxation. Mogens Lykketoft has served as chairman of several parliamentary committees. 1993-2001 he was Minister for Finance, the longest serving in a century, and the chief architect of economic reform. 2000-01 Mr. Lykketoft was Minister of Foreign Affairs, and 2002-05 he was chairman of The Social Democrats.

Bella Center
B3 M6 | EUPHA Section on Social Security and Health | **Challenges in comparative, epidemiological studies of sickness absence in Europe**
- The 9th pre-conference arranged by the EUPHA Section on Social Security and Health
Welcome with coffee / tea & surprise!
Opening,
Kristina Alexanderson, President of the EUPHA section on social security and health
Introduction to the topic of comparative studies in sickness absence,
Ute Bultmann and Angelique de Rijk, The Netherlands
Experiences with cross country studies on sickness absence,
Jan Hogelund, Denmark
Experiences of other researchers with European cross country studies: results of a pilot inquiry,
Ute Bultmann and Angelique de Rijk
1st discussion in groups: brainstorm and listing considerations in preparing comparative research
Moderator: Gunnel Hensing, Sweden
Funding for comparative research,
EU - representative
Considerations in preparing comparative research: Spanish-Dutch experiences,
Fernando Benavides, George Delclos, and David Gimeno, Spain
2nd group discussion about subthemes in a European guideline for comparative research in sickness absence
Following the bartender model, Moderator: Ute Bultmann
Reports from the bar tenders, Moderator: Ute Bultmann
Discussion: Summing up of the day & agreements on how to proceed, Angelique de Rijk
Dinner: For all participants where discussions will continue |
| **9:00 - 17:00**
Bella Center
B4 M7 | EUPHA Section on Child and Adolescent Public Health | **Qualitative research methods and dissemination of qualitative interviews studies on patients' experiences via the International DIPEx group**
Chairs: Sue Ziebland, United Kingdom and Auke Wiegema, The Netherlands
Introduction to the pre-conference workshop
Section I: Qualitative Research Methods workshop
Chair: Auke Wiegema, The Netherlands
What are qualitative research methods and why would we use them in health research?
Sue Ziebland and Sara Ryan, Oxford, United Kingdom
(tittle to be confirmed) Joyce Lamerichs, The Netherlands
Researching across and between multiple cultures, Hannah Bradby, United Kingdom
Section II: Qualitative Research Methods: Presentations of completed DIPEx International websites (Healthtalkonline, DIPEx Germany and DIPEx Spain)
Chair: Sue Ziebland, United Kingdom
Help, demented! Patient and carer speak up? First results,
Manna Alma and Griet-Anne Banga, The Netherlands
“Doctors blame everything on smoking, don’t they?”: rationalising and resistance amongst smokers,
Laura Griffith, United Kingdom
Discussion and close-up |

Latest EU Council recommendations on childhood immunisation: what is the expected impact on EU public health, *PL Lopalco, ECDC*  
Q&A session  
Moderator: *Ruth Gelletlie* |
Vaccination coverage in a population is an indicator of sustainable development. Vaccines do not only prevent diseases and their complications, they also help avoid or reduce their social, psychological and economic outcomes: hospitalisations, pain, distress, sickness absence, child care. Senior vaccination contributes to healthy and active ageing. Reduction of vaccine preventable diseases improves the functioning of hospitals, day care centres, education and business.

Yet many recommended vaccines remain underused with important health consequences and societal costs. Since the beginning of 2011 there has been a worrying resurgence in cases of measles in 24 European countries, with in some areas five times more cases than in 2010. Many outbreaks and hospitalisations have been reported, particularly in France, Spain, Switzerland, Belgium, the UK and Germany. Though measles vaccination has been recommended for many years in these countries, the overwhelming majority of cases were non-vaccinated subjects. This situation illustrates the challenges of routinizing vaccines:

- How to better inform the lay public and change attitudes?
- How should governments promote their health policy to increase vaccination uptake?
- How to improve access to and opportunities for prevention?

The objectives of this roundtable are to
- remind the public health impact and societal costs of suboptimal coverages of recommended vaccinations (eg measles, flu, pertussis, HPV)
- show the individual and collective benefits of routine vaccination in terms of both health and welfare (eg psychosocial burden, societal consequences of disease);
- better understand the main barriers and drivers, and explore innovative ways to improve the acceptance, access to and effective implementation of vaccination, using good practices, better cooperation and insights from social sciences.

The speakers of the round table will try to answer these questions and propose relevant approaches and practical actions. This will be illustrated by measles and HPV vaccination. The audience will have the opportunity to ask questions to the panellists and open a debate.

The expected outcome of this session is to provide the participants with data, arguments and guidance to improve the routinization of vaccines and help maximize the benefits of vaccination for individuals and society’s benefit.
"Advancing health and welfare through vaccination Benefits and challenges of routinizing vaccines”

CONFERENC INFORMATION FROM A-Z

Abstract book
Abstracts of all presentations in the scientific programme are published in the supplement of the European Journal of Public Health. You will find a copy in your conference bag.

ATM
Withdrawal of money is possible in the West Hall next to the reception.

Catering
Lunch and coffee is served in the exhibition area.

Cloak room
There will be a guarded cloakroom available on Thursday and Saturday. Cloakroom on Friday the wardrobe will be on your own responsibility.

Evaluation
We kindly ask you to fill in the online evaluation form – during the conference or after the conference via the website www.eupha.org

First aid and emergency service
A first aid officer will be available in the Conference Centre. Please ask the staff for help. Number for police – ambulance - fire brigade: Dial 112

Internet
Wireless internet is available free of charge in the entrance areas, in the foyer below the auditoria, in the exhibition area and on the 1st floor. The network is called BC-Guest, is open and requires no password. Kindly provided by EUPHA and ASPHER.

Local Transportation
The Bella Center has its own Metro Station called “Bella Center”. It will take you 12 min. from the city centre. Please note that there is no metro stop at the Central Station. Please use the station called “Nørreport” instead. A map of the metro lines can be found on www.m.dk

Posters
The poster exhibition can be found in the B-halls on the ground floor. The moderated poster sessions will take place in the poster area. Please put up your poster at the poster boards assigned to you using the special tape provided in the hall. Posters should be removed from the boards from 14.00 on Saturday 11 November.

Registration/Hospitality desk - opening hours during the conference
Wednesday, 9 November 07.30-17.00
Thursday, 10 November 07.30-17.00
Friday, 11 November 08.30-17.00
Saturday, 12 November 08.30-14.00

Smoking
The European Public Health Conference is a non-smoking conference. Please move away from the entrance when smoking.

Speakers pre-view room
Speakers shall hand in their presentation to the technician in the morning of their presentation. The pre-view room is in BV 3 on the 1st floor.

Staff
You will recognize our staff by their green t-shirts with the text ASK ME.
WELCOME RECEPTION, THURSDAY, 10 NOVEMBER
There are two receptions: one at the City Hall and one in the Bella Centre. It is not possible to attend both. The welcome reception at the City Hall starts at 19.30 and is limited to 600 delegates. The welcome reception in the Bella Center starts at 18.45.

The delegates choose which reception they wish to attend when they regisseate at the registration desk.

Dress: informal

CONFERENCE DINNER, FRIDAY, 11 NOVEMBER 19.30
We are happy to invite you to the conference dinner at Øksnehallen on Friday 11.11.11. Øksnehallen is a unique hall in the old Meat Packing District in the centre of Copenhagen. A great evening with good food and wine awaits you.

A limited number of dinner tickets will also be available at the registration desk on-site for the price of € 60.

Øksnehallen, Halmtorvet 11, 1700 Copenhagen, is situated just 5 min. walk from the central station.

Dress: informal
