

PHG Special issue: 11th EPH conference

Dear members,

On behalf of the Public Health Genomics (PHG) Section, we would like to present you the special issue of our newsletter and invite you to participate at our activities during the 11th EPH conference. The sessions will be a great opportunity for networking, sharing ideas, and much more!

Hope to see you there!

Type	Title	Track	Time
PHG Workshop	7.F. Workshop: Personalised Healthcare: How is this relevant for advancing health in Europe?	F. Health systems and health care	Friday 30th 16:20-17:50
Join the network meeting	JTN7 - Public health genomics: Join the network	/	Thursday 29th 12:15-13:15

We are proud to announce that the workshop ***“Personalised Healthcare: How is this relevant for advancing health in Europe?”*** organized by our Section will be held during the 11th EPH conference in Ljubljana on Friday 30th November from 16.20 to 17.50.

You will hear excellent presentations from international key-speakers. The workshop will be chaired by Dr. Natasha Azzopardi Muscat (President of EUPHA) and Prof. Paolo Villari (Sapienza University). We look forward to seeing you in Ljubljana and hope to generate some creative and dynamic discussions.

Key messages:

- By raising awareness on the potential and challenges for implementing personalized health care, the workshop aims at joining forces among different stakeholders and at fostering collaboration.
- Personalized healthcare: the workshop will discuss and propose innovative methods in which public health professionals can foster their awareness and engagement.

During our workshop we will have the pleasure to present the final outputs of the PRECeDI project: ***“Recommendations for Personalized Medicine: the contribution of PRECeDI in the field of prevention”*** .

The recommendations have been presented at the final conference in Brussels on November, 7th, 2018 (<http://www.precedi.eu/site/index.php/courses/seminars-and-conferences>), organized inside the H2020 framework “PRECeDI - Personalized PREvention of Chronic Diseases” and coordinated by Stefania Boccia -Full Professor of Hygiene and Preventive medicine at the Catholic University (Rome).

**WE VALUE
YOUR INPUT**

The event gathered together experts who discussed how current scientific research in the field of personalized medicine can be adopted for the definition of effective prevention strategies, with the final aim of contributing to improve the health of the European citizens. During this event, final

recommendations on “how to integrate personalized medicine in the field of prevention” were presented and discussed. The recommendations are targeting policy-makers, scientists and industry, with the main goal to foster the integration of personalized medicine approaches in the field of chronic disease prevention.

The recommendations are open to public consultation until December, 2nd, 2018 and can be found using the link:

<http://www.precedi.eu/site/index.php/open-consultation-on-how-to-integrate-personalised-medicine-in-the-prevention-of-chronic-diseases>

**JOIN OUR
NETWORK**

We are constantly striving to increase our visibility, enforce networking activities between our members and welcome new members to our PHG section.

You are very welcome to join us at the **Join the Network** meeting during the conference in Ljubljana (Thursday 29th, from 12.15 to 13:15).

We look forward to seeing you soon!

With warmest regards,

Róza Ádány and Stefania Boccia
